150 km/h

How can a plastic material be eco-friendly ?

- Palmex contributes to gain **LEED*** credits for **sustainability certifications**.
- Palmex **50 year lifespan** has a direct effect on **reducing massive over harvesting of natural resources** around the world.
- Palmex thatch does **NOT require any fumigation nor any other toxic treatments** against insect, mildew or fire.
- **Zero waste production**. All production waste is entirely recycled.
- Palmex is **100% recyclable**.

- **No waste of packaging**. Palmex packaging can be used as a roofing material to cover roof junctions.
- Highly resistant, no teared off pieces due to high wind, therefore **no ocean contamination**.
- **Energy saving** : Palmex offers greater insulation for air conditioning buildings.
- US and Canada Green Building member.
- Compressed packaging: less shipping volume, therefore **less gas emissions**.
- **Positive influence** towards the clientele.
